- Introduction to SQL.
- PhpMyAdmin
- PHP with MySQL Connectivity
- Mini project Work

PHP(short for Hypertext PreProcessor) is **the most widely used open source and general purpose server side scripting language used mainly in web development to create dynamic websites and applications.**

PHP is a fast and feature-rich open source scripting language used to develop Web Applications or Internet / Intranet Applications. MySQL is a powerful open source database server built based on a relational database management system (RDBMS) and is capable of handling a large concurrent database connection.
